    2 : "marks"
  ]
  "Subjects" : [
    0 : "subject_id"
```

```
    ]
    "Subjects" : [
        0 : "subject_id"
        1 : "subject_name"
        2 : "student_count"
    ]
}
```

Input your Query in Plain Text :

find students who got marks>90 in each subject

Get Query Response 🔍

Generated SQL Query: SELECT DISTINCT name FROM Students AS S JOIN Marks AS M ON S.id = M.id WHERE M.marks > 90

Query Response 📃

	name
0	John Doe
1	Sam Brown
2	Alice Johnson
3	Bob Lee
4	Cathy Brown

Input your Query in Plain Text :

how many subjects are there

Get Query Response 🔍

Generated SQL Query: SELECT COUNT(*) FROM Subjects;

Query Response 📄

	COUNT(*)
0	5
